INDEX TO VOLUME XIX, SERIES II.

A.

Absorbing Materials, On the Gamma-Ray Action of Extensive Flat Radium Preparations at Different Distances with and without, *Victor F. Hess*, 73.

Absorption, The, by Water Vapor of Radiation of Wave-Lengths near 6 μ, *W. W. Sleator* and *E. R. Phelps*, 394.

Absorption Spectra, The Infra-red, of Diatomic Gases and their Ionization Potentials, *Edwin C. Kemble*, 394.

Absorption Spectrum, The, of Hydrogen Chloride at 200° K., *B. J. Spence* and *C. Holley*, 397.

of Chloroform in the near Infra-red, *J. W. Ellis*, 546.

Absorption of Water, The Effect of Certain Dissolved Substances on the Infra-red, *J. R. Collins*, 395.

The Effect of Certain Dissolved Substances on the Infrared, *J. R. Collins*, 395.

Acoustic Wave Filters, Theory of, The Limiting Frequencies of Transmission, *G. W. Stewart*, 401.

Ageing, The Effect of, on the Secondary Electron Emission from Copper Surfaces, *L. E. McAllister*, 246.

Adhesion, Cohesion and, *Wilson Taylor*, 413.

Alpha Particle, The Charge on the, *J. E. Shrader*, 422.

Alpha Rays, Multiple Valency in the Ionization by, *T. R. Wilkins*, 210.

Alternating Current, Effects obtained with an, sent through a Capillary Electrometer, *R. D. Kleeman* and *D T. Simmonds*, 541.

Aluminum, The Scattering of Electrons by, *C. Davisson* and *C. H. Kunsman*, 534.

Aluminum Spectrum, Two New Lines in the, and their Possible Series Relations, *G. D. Shallenberger*, 398.

Amalgams, The Causes of Reaction Expansions in, *Arthur Gray*, 405.

American Physical Society:

Abstracts, 243, 379, 526, 545.

Minutes, 241, 374, 525, 544.

Angular Velocity, The Path of a Rigid Electron Moving in a Magnetic Field of Constant Strength Rotating with Constant, *E. O. Hulburt*, 245.

Anthracene, The Ultraviolet Absorption of, and Benzene, *J. M. Hyatt*, 391.

Antimony, The Luminescence of Solidifying, *E. Karrer*, 437.

Aragonite, The Crystal Structures of, and Related Minerals, *Maurice L. Huggins*, 346.

Aragonite, The Crystal Structures of, and Related Structures, *Maurice L. Huggins*, 354.

Argentite, The Production of an E. M. F. on Closed Circuit by a Light Effect on, *H. Horton Sheldon* and *Paul H. Geiger*, 389.

Argon, The Sparking Potential in, at Reduced Pressures, *E. R. Stoekle*, 258.

Arnold, H. D., The Growth and Decay of Photo-Thermionic Currents from Oxide-Coated Filaments, *H. D. Arnold* and *Herbert E. Ives*, 248.

Arsenopyrite, The Crystal Structures of Marcasite (FeS_2) and Lœllingite ($FeAs_2$), *Maurice L. Huggins*, 369.

Atom, Ionization and Radiation Potentials and the Size of the, *Bergen Davis*, 535.

Atoms, Note on the Distribution of Range of Recoil, *K. T. Compton*, 233.

On the Universal Distance of the Order of 10^{-8} cm. between the Centers of the nearest, in Solids, *Albert C. Crehore*, 251.

Atomic Constants and Dimensional Invariants, *A. C. Lunn*, 265.

Atom Nuclei, A Graphical Study of the Atability Relations of, *William D. Harkins* and *S. L. Madorsky*, 135.

Atomic Radii, I., *Maurice L. Huggins*, 346.

Audion, On the Operating Characteristics of the, *Lynde P. Wheeler*, 531.

Audion Bulbs, Photo-Electric Phenomena in Coated-Filament, *R. C. Gibbs* and *Edna L. Meacham*, 415.

Audition, Minimum Sound Energy for, for Tones of High Frequency, *C. E. Lane*, 492.

B.

Baker, Will C., A New Gyroscopic Construction in Simple Vectors, 323.

Band Spectra, Carbon Dioxide, in the near Infra-red, *E. F. Barker*, 247.

Barker, E. F., Carbon Dioxide Band Spectra in the near Infra-red, 247.

Barnett, S. J., A Sine Galvanometer for Determining in Absolute Measure the Horizontal Intensity of the Earth's Magnetic Field, 425.

Electric Fields due to the Motion of Constant Electromagnetic Systems, 543.

Bauer, Louis A., Results of Comparisons of
